

Overview of the national language requirements for warnings, information and documentation as foreseen by the Member States' transposition legislation of Directive 2009/48/EC on the safety of toys

The following provisions of the Toy Safety Directive 2009/48/EC allow the Member States to determine in which language(s) warnings, information or documentation for toys must be provided within their respective national territories:

- Articles 4(7), 6(4) and 7(2), with regard to **instructions and safety information accompanying the toy**;
- Article 11(3), with regard to **warnings and safety instructions**;
- Article 15(2), with regard to **the EC declaration of conformity**;
- Articles 20(5), 21(2) and 21(3), with regard to **the technical documentation**;
- Article 20(5), with regard to **the correspondence relating to the EC-type examination procedures**;
- Articles 4(9), 6(9) with regard to **all the information and documentation necessary to demonstrate the conformity of the toy**.

This document provides an overview of the language(s) the use of which is required for such warnings, information or documentation, as determined by the Member States' legislation related to the transposition of the Toy Safety Directive. The language requirements in Norway and Switzerland are also included in the overview, as those countries also apply legislation based on the Toy Safety Directive. The overview is presented in table format and lists, for each country, the required language(s) as well as the reference of the related national legislative act.

This document is a non binding document intended to provide information and assistance to economic operators and other stakeholders. It was compiled based on information provided, at the European Commission's request, by the respective competent authorities in the Member States, Norway and Switzerland. The European Commission takes no responsibility for the accuracy or completeness of the information provided. Only the national legislation laying down the language requirements is legally binding.
